NOTES

Thin Tile is for wall use only. Please see your architectural representative regarding installation and maintenance recommendations.

Special care should be taken when grouting with dark pigmented colors. A grout release is recommended to prevent finely powdered pigments from lodging in the pores of the surface. Use of a latex modified thin-set is recommended for installation.

Special care needs to be given when installing tiles 20" and larger. Please refer to www.daltile.com/LargeTiles for information.

Since there are variations in all fired ceramic products, tile and trim supplied for your particular installation may not match these samples. Final color selection should be made from actual tiles and trim and not from tile and trim samples or color reproductions. Manufactured in accordance with ANSI A 1371.1 standards.

For additional information, refer to "Factors to Consider" at www.daltile.com/CommercialFactors. Water, oil, grease, etc. create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection. Not for use on ramps.
