

# AirMedic Series

## Air Filtration Ideal for the Allergy Sufferer

With its advanced particle control and air filtration capacity, the AirMedic series is the ideal choice for the allergy and asthma sufferer. The AirMedic series is designed with 360-degree air intake, allowing for greater contact with particles and more effective filtration.

An additional 18-25 pounds of activated carbon round out this remarkable air purification system, providing additional protection from airborne chemicals, gases and odors, to which allergy and asthma sufferers may also be sensitive.

### ■ Customizable Features

#### Activated Carbon Blend

**Exec Blend:** Our Exec carbon is our general-purpose blend, ideal for trapping a wide range of airborne chemicals, gases and odors.

**Vocarb Blend:** Our Vocarb carbon is our boosted blend, offering a more aggressive removal of hard-to-trap airborne chemicals, gases and odors. This blend is best suited for newly renovated environments, unknown contaminants and/or formaldehyde.

**Custom Blend:** Have an unusual IAQ problem? Let us customize the perfect carbon blend solution!

#### Filter Depth

A unit's filter depth is key to its adsorption capacity. Customize your unit with a 2" (regular) or 3" (deep or "D") carbon bed filter to maximize its chemical-adsorption efficiency.

### ■ Optional Features

#### Pro Option

Ask about our Pro series to equip your unit with a 6" exhaust duct for negative air.
