REMINDERS

- **Always wear protective gloves or use a pot holder when tending a fire.

 - **Do NOT add gasoline, kerosene, diesel fuel, lighter fluid or alcohol to relight or enhance an existing fire.
1. Carefully remove the Spark Guard/Firescreen by using the Fire Tool provided.
 2. While using the long handled Fire Tool, shift coals and logs to allow additional airflow.
 3. If additional wood is required, place wood on top of coals. Be careful not to shift ashes.
 4. Replace Spark Guard/Firescreen by using the Fire Tool provided.

Extinguishing the Fire

1. Allow the fire to burn itself out.
2. Do NOT use water to extinguish a fire as this is dangerous and can cause damage to the outdoor fire pit.

FireSense® products are made to resist premature rusting. However, eventually, all metals will rust. Some environments promote premature rusting of metals. For best results, at the first sign of rust or other corrosion, use an emery cloth, metal-grade sand paper or a rotary tool to buff away the blemish and touch up the spot with rust-resistant spray paint available at local hardware stores.
