Basic Brush Shapes

To assist in brush selection, the following is a brief description of how each brush is used and a sample brush stroke.

Note: Short handle brushes are generally used for watercolor painting and long handle brushes for oil/acrylic painting.

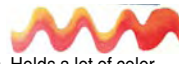

Angular shader – 
 A versatile brush used to paint both sharply defined edges and contrasting softly shaded areas like foliage.

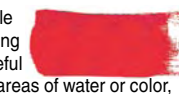

Bright – Similar to Flat, but with shorter stubbier bristles to provide more control for details. Produces short, crisp paint strokes. 

Fan – For blending and softening the edges of other strokes. Dry brushing to create special effects like grass, trees, hair, and shrubbery. 

Filbert – For edges and areas requiring tight control. Gives a rounded look to a flat stroke. 

Flat – For broad, sweeping strokes, for laying in large areas of color like the sky. 

Flat shader – For blending and large, even strokes. Holds a lot of color. Creates crisp clean edges. 

Hake – Oriental-style wash brush on a long flat handle. It is useful for laying in large areas of water or color, for wetting the surface and for absorbing excess paint. 

Liner – Extra-long hairs, a short handle and round ferrule. Carries lots of color. Creates consistent thick to thin lines for delicate lettering, outlining, and long continuous strokes. Use for tree branches, vines, and foliage. 

Mop – Round, full version of the wash brush, made of soft, absorbent natural hair. Useful for laying in large areas of water or color, for wetting the surface, and for absorbing excess media. 

Round – An all purpose brush for fine detail and outlining, thick to thin lines, calligraphy. 

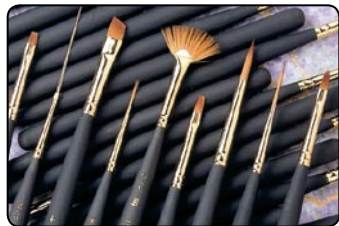

Stroke – Flat ferrule, square-ended medium to long length hairs. Short handles. Carries lots of color. Great for painting block letters in one stroke. Use for lettering, blending, and glazing. 

Wash – For broad strokes and blending. Apply washes of color or finishes. 

PRINCETON®
Brush Displays

Princeton displays are very functional, have rich wood panels, and excellent consumer graphics. All displays listed look similar to the display shown here.

PRINCETON®
Best Synthetic Sable
Miniature Watercolor
and Acrylic Brushes

Unique non-slip comfort control short handles. Synthetic sable blend for better brushability and color holding capacity for fine detail painting.

ROYAL & LANGNICKEL®
Best Vienna Synthetic Bristle
Acrylic and Oil Brushes

Made in the tradition of an old world bristle brush with a modern twist by utilizing only the best quality synthetic bristle filaments that taper with the natural curve of an interlocking natural bristle. These extremely durable and strong synthetic bristles brushes are excellent for heavy body acrylics, oils, caseins, and water-soluble oils, and are ideal for moving large amounts of color in bold strokes, or for working with thickening mediums. Brushes maintain shape and stiffness, particularly in water. Features copper-plated brass ferrules and SilkTouch handles.

Acrylic and Oil Brushes

These are the ultimate bristle brushes featuring only the finest naturally interlocking Chungking bristle. These easel-length brushes are handmade using high-quality, hand selected, extra white bristles chosen for superior quality. Brushes possess a high degree of spring, precision, and durability providing the artist with exceptional control. The naturally flagged tips hold impressive amounts of color. Features double-crimped black chrome-plated brass ferrules and SilkTouch handles.

WINSOR & NEWTON™ Artists' Hog Bristle Oil Brushes

Best suited for all types of oils, but also suitable for acrylic. Superior quality hog bristles for long lasting working edge and shape. Stiff bristle for control of full-bodied color. Natural curve of bristle provides excellent spring. Contoured black handle provides balance and comfort. Matte finish minimizes glare when painting outdoors.

WINSOR & NEWTON™ University Synthetic Acrylic and Oil Brushes

All purpose range of extremely versatile white synthetic brushes. Stiff enough to use with fluid oils and acrylics, yet soft enough to use with watercolor. Polyester filaments offer excellent spring and shape retention and smooth brush marks. Durable and easy to clean.

**COLOUR SHAPER®
Silicone Brushes**

Silicone tips give a combination of control, precision, and fluidity that are uniquely inspiring. Allow for exciting textures, marks, and effects. Tips are non-absorbent so they can be cleaned with a wipe and dried glue or paint can peel right off! Ivory tips are soft and designed for fluids and soft colors, while grey tips are firm and offer resistance for extraordinary control over polymer clay, heavy body, and paste paints. Black tips, also known as Clay Shapers, are much firmer and best for sculpting, ceramics, and modeling. Wide flat tips work like a spatula; use it to apply and spread even layers of paint or adhesive; evenly blends pastel, charcoal, and soft graphite. Curve wide tips work like a squeegee; use the sharp edge to carve paint cleanly or to apply super thin layers and the round edge smoothes brush strokes. The decorator tips have pre-cut slits to add unique texture to a paint surface; use for graining, patterns, striping on canvas, paper, walls, or furniture.

**THE MASTERS®
Brush Cleaners**

Keep brushes like new with this lemon-scented cleaner and preserver. Even old, hardened, oil paint brushes may be restored to their original snap and luster. Non-toxic water-soluble cleaning compound works safely on oils, acrylics, or watercolors. Rinse brush under warm water, swirl it in the cleaner until a lather forms, then rinse. Repeat if necessary until brush is clean. No harmful fumes or odors.

SILICOILTK

**SILICOIL
Brush Cleaning
Fluid and Tank**

Fluid is extremely slippery and instantly slides color solids from bristles of brushes while preserving and conditioning them. Does not lose potency, can be used repeatedly. May also be used with cleaning tank. Tank contains a smooth aluminum coil screen which, when submerged in cleaning fluid, effectively removes color solids from the bristles as the brush is rubbed across the coil.
