

CARE AND CLEANING INSTRUCTIONS FOR PORCELAIN PANELS

INITIAL CLEANING •

This procedure must be performed, prior to use, to ensure proper erasure of the panel.

- 1** Clean panel with a clean cloth moistened by a non ammoniated liquid cleanser. Rinse with clear water, then wipe dry with a clean soft towel.
Note: Best results may be obtained by washing the panels with a sponge and squeegee, similar to washing a window.

HELPFUL HINTS •

- 1** The panels should be cleaned 2 to 3 times weekly, as described above.
- 2** Interim cleaning may be done by sprinkling a dry powdered cleanser, such as Bar Keeper's Friend, on the eraser and applying to the panel in a circular motion. Rinse with clear water. *Erasure problems may occur if clear water rinse is not done.*
Note: More frequent cleaning may be required if the writing is left on the panel for 2 to 3 days.

CAUTION : DO NOT USE ON SILK SCREENED BOARDS

- 3** To remove crayon, Scotch tape, etc., dampen a clean, dry cloth with water. Sprinkle a small amount of powdered cleanser, such as Bar Keeper's Friend, onto the cloth. Use less cleanser for chalkboard surfaces. We recommend using Bar Keeper's Friend. Begin cleaning a small, manageable area using a back and forth horizontal motion. Use normal pressure as if you were cleaning a window. Wipe off all residue with a dry cloth. Rinse well with clear water. Please note that the rinsing and drying steps are very important. Wipe dry with a clean cloth.
- 4** To remove Permanent Marker, moisten a clean, dry cloth with isopropyl alcohol. Wipe the board in a circular motion to loosen marker residue. Rinse with clear water. Dry the board with a clean cloth. Repeat these steps as often as necessary to remove all residue.
CAUTION : DO NOT USE ON SILK SCREENED BOARDS
- 5** For best results, use Dry-Erase marker pens, designed for use on porcelain panels. Marker pens should be tightly capped and stored horizontally.

SILK SCREENED BOARDS CLEANING INSTRUCTIONS•

Silk Screened Graphic Boards should be cleaned **ONLY** with **NON-AMMONIATED** glass cleaners. **IMPORTANT : DO NOT USE any cleaner which contains either Isopropyl Alcohol or Ammonia on Silk Screened Graphic Boards.** Use of such cleaners may result in damage to the board's graphics.
