

# HamiltonBuhl PowerStacker™ Tower with Modular Components

## LTBB10 and LTCC20

HamiltonBuhl PowerStacker™ Tower with Modular Components are mix-and-match, expandable charging stations. These units can be combined into almost any configuration you need, and can hold from 10 to up to 40 devices.

Each cart can charge laptops, Chromebooks and iPads simultaneously in the same cabinet. The double-lock doors ensure that devices are well-protected, and tablets are secured, for round-the-clock protection while charging.

They may also be programmed for sequential charging so as not to exceed the 15 amp limit available in most classrooms.

charging carts
