*Silver: IMG*

hardware specifications	graphic specifications	additional info
Size: 87"h x 33"w	Graphic size is variable 31.5"w x 29.53 - 83.85" (+12" bleed)	Shipping weight with bag: 9.9

# Assembly Instructions

Kit includes : base with cartridge, bungee pole set and carry bag

1 Slide open both pole retainers and remove the bungee pole set from the base

2 To open, **slide down both** locking tabs on the left and right sides of the base

3 Lift open the lid and note the 3 grooves inside the base

4 Place the banner cartridge into the base, ensure the cartridge rod is seated correctly into groove 1. Rotate the cartridge until the remaining rods are seated into grooves 2 and 3

5 To close, **press down firmly** onto both left and right sides of the lid until an audible click is heard. To lock, **slide up both** locking tabs into the position shown above

8 Finally secure the banner into position by locating the top rail hole with the bungee pole

6 Assemble the bungee pole and insert into the base

7 Lean the bannerstand backwards and extend the banner by lifting the top rail until the complete image is visible

## Guidelines for Graphic Substrates

1. Material thickness must be between 225 and 300 microns in total
2. The substrate must be pliable and suitable for roller banner stands
3. After fitting, the graphic should be left for 24 hours before use to ensure the adhesive bonds sufficiently

## Notes

1. For loading graphics into the cartridge refer to separate instruction sheet U1095
2. Take care when lowering the banner (do not drop) to prevent damage to the graphic.
