

Neato knows how to get your home clean.

Neato Botvac D75

Everyday vacuuming on all floor types.

Neato Botvac D80/D85

Everyday vacuuming on all floor types. Specially designed to pick up all types of hair—ideal for homes with pets.

The smartest, most powerful robot vacuum.

Industry experts like CNET agree. Neato is best at picking up pet hair.

LaserSmart™ technology.

Uses laser technology to scan each room 360 degrees, identifying furniture, doorways, and stairs. It then creates a map and methodically cleans, moving from room to room in the most efficient way.

D-shape design and CornerClever™ technology.

Gets to where dirt hides—in corners and along walls.

SpinFlow™ Power Clean system.

A combination of powerful suction and precision brushes, easily removes pet hair and debris from all floor surfaces, including hardwood, tile, and carpet.

Cleans on a schedule.

Easily schedule the robot to clean everyday—or on a schedule that works for you. You will enjoy coming home to that just-vacuumed look.

Extra-large bagless dirt bin.

Holds more and is right on top so it's easier to empty. Bagless, so it's environmentally friendly, too.

10MM

Cleans closer to the walls.

Neato cleans within 10mm of the walls and corners.

98MM

Round robots are 98mm away from the walls—and even further from the corners.

Neato Robot Vacuums.

Cleans up to four times faster—so it can really go the distance.

Other Robots

Other robots randomly bounce around the room.

Neato Robots

Neato scans and systematically cleans.

Neato uses LaserSmart technology to plan the most efficient course and clean in record time. Because it's not wasting energy bouncing around like round robots, Neato cleans more space on a single charge. If it needs more juice, Neato automatically returns to the charge base, powers up, then goes back to finish the job.
