Stratton Pendant Large (LED)

GENERAL PRODUCT INFORMATION:

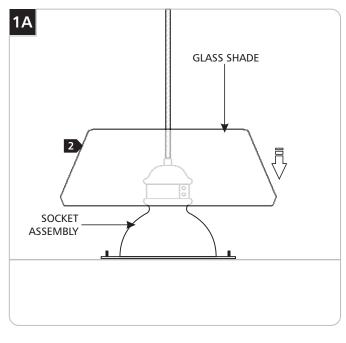

This product is suitable for damp locations.

This product can be dimmed with a low-voltage electronic dimmer.

CAUTION - RISK OF FIRE This product must be installed in accordance with the applicable installation code by a person familiar with the construction and operation of the product and the hazards involved.

Use minimum 90°c supply conductors.

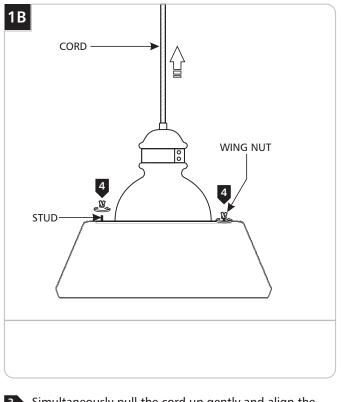

Install the Glass Shade

1 Place the socket assembly on a flat surface.

2 Place the glass shade over the socket assembly.

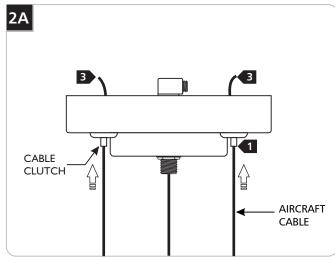

Simultaneously pull the cord up gently and align the studs with the holes on the glass shade.

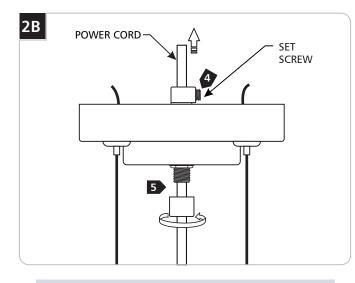

4 Secure the glass shade in place by tightening the wing nuts onto the studs.

CAUTION: Do not over-tighten, the glass may break resulting in injury.

Install the Fixture

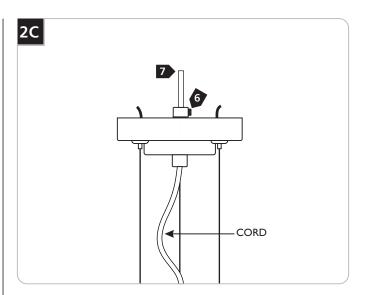

- Feed the aircraft cables through the cable clutch in the canopy.
- 2 Evenly pull the aircraft cable up through the canopy to raise the fixture to the desired length.
- Cut off the excess aircraft cable leaving enough for fine leveling later.

Note: Taping down the frayed end of the cloth cover may assist in feeding the power cord through the strain relief.

4 If necessary loosen the set screw in the strain relief and feed the power cord from the fixture through the cap and into the canopy.

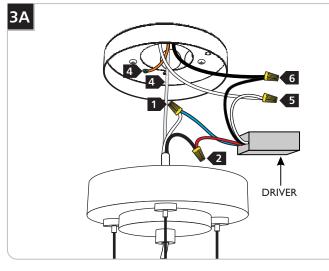

5 Re-screw the cap back on.

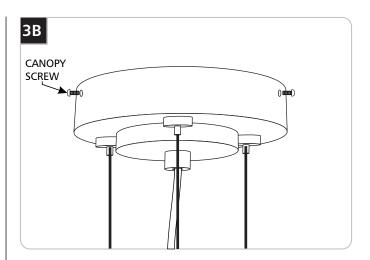

NOTE: The power cord does not support the fixture. For a casual "lazy cord" look, cut the power cord several inches longer that the drop height of the fixture.

- 6 Once the desired look is determined, tighten the set screw on the strain relief.
- Leave 6" of the cord behind the canopy for power connections and cut the excess cord.

Install the Canopy

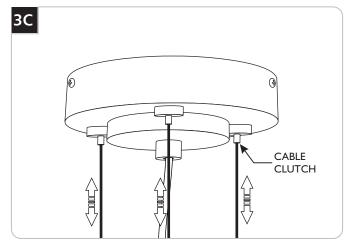

- **1** Strip the cable behind the canopy and also strip the ends of the inner wires.
- 2 Connect the blue driver wire to the insulated pendant wire with the white tracer (white wire).
- 3 Connect the red driver wire to the other insulated pendant wire (black wire).
- 4 Connect the fixture and the crossbar ground wire to a suitable ground in accordance with local electrical codes.
- **5** Connect the white driver wire to the neutral power line wire.
- 6 Connect the black driver wire to the hot power line wire.

8 Remount the canopy to the backplate by securing

9 Adjust the aircraft cables until the fixture is level; feed the cable into the cable clutch to raise the fixture and push in on the cable clutch nipple to release the cable and lower the fixture.
