

T~TRAK

HEADS-LINE VOLTAGE

GENERAL PRODUCT INFORMATION:

This product is suitable for indoor dry locations only.

This product is intended for use only with Tech Lighting Power Jack & T~trak™ systems.

This product is patented (U.S. PAT. 7,172,332).

NOTE: Turn off power to the system before installing, removing, or relamping the fixture.

Install the MR16 Lamp (MR16 versions only)

Use **ONLY 20 Watt** GX10 Base MR16 Ceramic Metal Halide lamp with models **700PJSSC162_.**

Use **ONLY 39 Watt** GX10 Base MR16 Ceramic Metal Halide lamp with models **700PJSSC163_.**

1 Push the lamp pins into the large portion of the socket slots and rotate clockwise to lock the lamp in place securely.

2 Push the lamp edge against the springs inside the ring until the edge of the lamp locks behind the springs.

IMPORTANT SAFETY INSTRUCTIONS

To reduce the risk of fire, electrical shock, exposure to excessive UV radiation, or injury to person:

- Use this fixture indoors only.
- Do not look directly at the lighted lamp.
- Do not remain in light if skin feels warm.
- Risk of fire: Use only the type of lamp and maximum wattage indicated in this instruction manual.
- Never cover the Ceramic Metal Halide lamp with anything other than a Tech Lighting lens and never place flammable material close to your fixture.
- Never turn the fixture on and off by connecting and disconnecting the CMH lamp.
- Do not touch the fixture shades or lamp shield while the fixture is on. These surfaces may be HOT.
- Relamp fixtures at or before the end of rated life. Beyond rated life, light output diminishes while energy consumption and risk of rupture increases.

CMH Lamp General Information

- A new CMH lamp is a discharge lamp and requires some time to start and come to full brightness after a power interruption.

A Tip For Prolonging CMH Lamp Life

- Do not operate the lamps continuously for extended periods, turn the lamp off once per week for at least 15 minutes. This will reduce the risk of rupture.
