

# NEXUS i SERIES

Nexus i/SL Range Made in the UK

## NEXUS i/SL SERIES

Standard Black Finish

Silver Metallic

Graphite Metallic

Made from heavy gauge steel and with cable management now included, Nexus can be mass loaded with Atabites through the main centre tube to help achieve maximum performance.

The new 'i' version includes our Isolation gel pads to further improve their sonic performance. A new mini top plate is also available as an option with dimensions of 130mm wide, 200mm deep and 3mm thick.

A choice of 4 height options are available.

Optional top plate (not illustrated) available for slim yet deep speaker cabinets width 130mm (5.1"), depth 200mm (7.9") or mini cabinets width 130mm (5.1") depth 130mm (5.1")

Cable management

Available in Black, Graphite Metallic and Silver Metallic

## SL SERIES

Our professional range of speaker stands caters for when a larger top plate is required.

Adjustable heavy duty carpet spikes are supplied as standard, with the facility to add top spikes as an option. There are 7 different height models available to suit a wide range of speaker applications.

### Atacama isolation gel pads

Are designed to adhere to speaker stand top plates and are made from a high performance polyurethane elastomer which, as well as being non-slip and non scratch, gives excellent sound and vibration resistance. Supplied in packs of 8 in either clear or gloss black.

Available in Black, Graphite Metallic and Silver Metallic

## ATABITES

Atabites is high density filler designed for mass loading of speaker stands. They are 3 times denser than sand which interlock together creating minimum air gaps. Supplied in 9kg (20lbs) tubs.

## REMEMBER!
