

- Portable Presentation Screen for Pro
- QuickStand Folding Portable Presentation Screen

- Strong, lightweight and portable folding aluminum fixed-frame screen for multi-media conference/classroom presentations
- Standard Matte White (Gain 1.1) screen material
- Optional rear projection screen material (Gain 2.2)
- Sealed edge detachable frame design with material snap button attachments and corner pull cords to extend product life with prolonged use
- Easy setup and teardown design with no tools required
- Adjustable frame height can be raised or lowered at 8" increments for various presentations
- Lightweight and durable aluminum traveling case is wheeled for easy transport, storage and shipping for tradeshow and traveling presentations
- 150" plus-sized models come with AT legs for additional support while larger 180" & 200" models include SAT heavy support buttresses as well
- Available in 72" to 200" sizes in a 4:3 aspect ratio
- Two year Manufacturer's parts & labor warranty

Standard AT Legs come with 150" and larger models. Additional SAT buttresses for 180" and 200" also included.

Locking mechanism on the metal storage case ensures safety during the storage and shipping

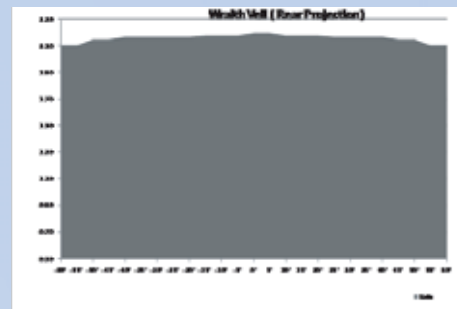

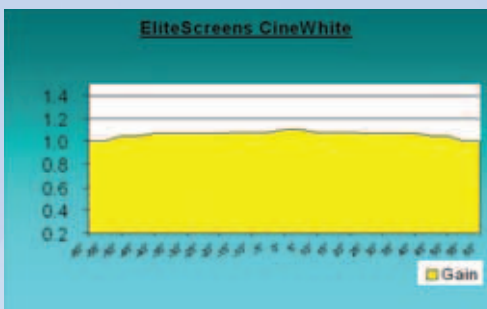

Light weight and durable aluminum traveling case is wheeled for easy transport, storage and shipping

Patented aluminum frame connections ensure structural integrity with constant use.

Strong Corner-Guard provides additional protection during transport and storage

Choose either CineWhite Front Projection or our new Wraith Veil Rear Projection Material

## See what the Experts said about CineWhite & CineGrey Material

"I found that it had a decent reflectivity to it, but didn't suffer too much from hot spotting (which obviously you would expect from a lower gain screen), nor did it have any sparkles or other anomalies to it. Elite certainly has a good idea here. Good performance, good build quality, and good features in a screen, for a lower price point.

AV Science, NY

By comparison, the Firehawk® screen tends to reject ambient light from the side, a little better than the ezFrame by Elite. (All's fair - an equivalent Firehawk fixed wall projector screen is much over double the price. Color was virtually identical, but yellows did appear just a touch stronger than on the Firehawk®. This was very close and not an issue. Overall color was very good. with a 100" 16:9 Elite ezFrame screen selling for about half of a Da-Lite Cinema Contour with ProTrim (their fancy flourish border), and barely a 1/3 of a Stewart Luxus Deluxe, it allows home theater people to own an attractive looking fixed wall screen, with good performance, at a price that simply isn't available from the larger established brands.
