

**Auto-Stop™ Wheels – 5”**

- Designed as a wheel and braking system, Autostop wheels combine rolling and braking in one product.
- For use on front legs of walkers, 5" rubber wheels are ideal for navigating difficult terrain such as grass, sidewalks and carpet. Wheels stop rolling when weight is applied to the front of the walker.
- Recommended for use on the rear legs of the walker when fixed or swivel wheels are used on front walker legs.
- 300 lb maximum weight capacity.
- Designed to meet the requirements of HCPCS code: E0155.
- Attractive retail packaging.
- Limited lifetime warranty.
- Kits of AutoStop Wheels and 3" or 5" fixed wheels also available.
