## **IMPORTANT SAFETY INSTRUCTIONS**

Before using this product, read the instruction manual for important safety information. Please retain this manual for future reference and warranty information.

### **Troubleshooting & Servicing**

Do not attempt to service or repair the device yourself. Refer all servicing to qualified service personnel. Do not attempt to modify the device in anyway. Doing so could invalidate your warranty.

### **Moisture and heat sources**

Do not use this apparatus near water (for example, sinks, baths, pools) or expose it to rain, moisture, dripping or splashing liquids. Do not expose the unit to high temperatures, high humidity or direct sunlight.

### **Cleaning**

When cleaning the device, please use a soft, dry cloth. Never use benzene, paint-thinner, or other chemicals on the device.

### **Location**

Place the device in stable location, so it will not fall causing damage to the device or bodily harm.

### **Intended use**

The product may only be used with the original parts intended for it. The intended use includes adherence to the specified installation instructions. The manufacturer accepts no liability for damage arising due to improper use.

**WARNING:** Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

### **IMPORTANT**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. The unit's circuitry may cause interference to nearby radios. To prevent interference, either switch the unit off or move away from the affected radio.

**NOTE:** This equipment has been tested and found to comply within the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio / TV technician for help.

**NOTE:** Shielded cables may be required to be used with this unit to ensure compliance with the Class B FCC limits.

# MAINTENANCE

## HANDLING CASSETTE TAPES

- If the tape is loose in its cassette, take up the slack by inserting a pencil in one of the reels and rotating. If the tape is loose it may get stretched, cut, or caught in the cassette.
- Do not touch the tape surface.
- To prevent recording from being erased accidentally, remove the tab(s) A and B.
- To record after the tabs have been broken off reseal the slots A and B with a piece of adhesive tape.

## CASSETTE DECK MAINTENANCE

The heads, capstan and pinch roller should be cleaned from time to time to prevent buildup of tape oxide, which degrades performance. We recommend cleaning after every 20-30 hours of operation.

1. Press the Stop/Eject key to open the deck door.
2. Remove cassette tape before cleaning.
3. Clean the head of all visible, reddish-brown oxide with a cotton-tipped swab moistened with a methyl alcohol or any solution specifically manufactured for this purpose.

CAUTION: DO NOT scrape the head surface with hard, sharp or abrasive objects. This will permanently damage the heads.

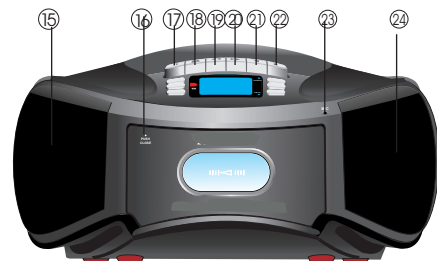

4. Clean the pinch roller by scrubbing the surface of the roller with the moistened swab. Rotate the roller by hand until the entire surface is clean.
5. Clean external case surfaces with a moist, soft cloth. Use only a mild detergent water solution.

## HEAD DEMAGNETIZATION

It is recommended that the tape heads be demagnetized after 20 to 30 hours. This eliminates residual magnetism which degrades sound reproduction. Be sure that the unit is turned off while you demagnetize.

1. After cleaning the heads and capstan, place the demagnetizer several feet away from the cassette unit and plug it into an AC outlet.
2. Follow the manufacturer's operating instructions supplied with the demagnetizer.
