**Questions?** Contact Customer Support at (877) 221-1252 or visit www.AcuRite.com.

**SAVE THIS MANUAL FOR FUTURE REFERENCE.**
Congratulations on your new AcuRite product. To ensure the best possible product performance, please read this manual in its entirety and retain it for future reference.

**Unpacking Instructions**
Remove the protective film that is applied to the LCD screen prior to using this product. Locate the tab and peel off to remove.

**Package Contents**
1. Display unit with tabletop stand
2. 5-in-1 sensor
3. Sensor mounting bracket
4. Mounting hardware
5. Snap-in debris filter for rain collector
6. Power adapter
7. Instruction Manual

**PRODUCT REGISTRATION**

Features & Benefits

5-IN-1 SENSOR

1. Rainfall Collector Funnel
2. Solar Cell Panel
   Converts sunlight into power to run internal aspirating fan.
   Internal Aspirating Fan (not shown)
   Draws ambient air into sensor to reduce solar radiation heating, resulting in more accurate temperature measurement.
3. A-B-C Switch
   ID code that must match display’s A-B-C switch to ensure units synchronize.
4. Battery Compartment
5. Temperature & Humidity Sensors (internal)
6. Mounting Point
7. Wind Speed Anemometer
8. Wind Direction Vane
9. Mounting Bracket
10. Mounting Hardware
    | Qty | Diameter | Length |
    |-----|----------|--------|
    | 4   | #4       | 1”     |
    | 2   | #6       | ½”     |
11. Debris Filter
    Snaps into rain collector to filter out twigs, leaves, etc.
Features & Benefits

Display Unit
1. Peak Wind Speed
   Highest speed from past 60 minutes.

2. Average Wind Speed
   of all speeds from past 2 minutes.

3. Learning Mode Icon
   Press to change the Weather Select category data being displayed.

4. Weather Select
   Heat index, dew point, wind chill, indoor temperature / humidity, rainfall rate (rain per hour)

5. Weather Select Button
   Press to change the Weather Select category data being displayed.

6. 12 to 24 Hour Weather Forecast
   Self-Calibrating Forecasting pulls data from the outdoor sensor to generate your personal forecast.

7. 5-in-1 Sensor Signal Strength

8. Alarm On/Off Indicator
   for Selectable Category (#31).

9. Programmable Alarm Settings

10. Indicates Active Weather Ticker Message
    During ticker customization mode.

11. Indicates Deactivated Weather Ticker Message
    During ticker customization mode.

12. ALARM On/Off Button
    Activate alarm; press and hold to adjust alarm values.

13. Deactivate Weather Ticker Message

14. ▲/▼ to Select Category (shown in #31) & Adjust Settings

15. SET Button

    Press to advance through messages.

17. All-Time Records Button
    Press for all-time low and date recorded for current category selected on display (#31). Press twice for all-time high and date recorded.

18. Activate Weather Ticker Message

19. Current Outdoor Temperature
    Arrow icon indicates direction temperature is trending.

20. Outdoor Temperature Alarm On Indicator

21. Current Outdoor Humidity
    Arrow icon indicates direction humidity is trending.

22. Outdoor Humidity Alarm On Indicator

23. Storm Alert Alarm On Indicator

24. Current Rainfall
    Accumulates data during rainfall.

25. Rain Alarm On Indicator

26. Current Barometric Pressure
    Arrow icon indicates direction pressure is trending.

27. All-Time Rainfall

28. Current Month Total Rainfall

29. Date

30. Clock

31. Selectable Category

32. Record Highs
    Shown for current category selected on the display (#31).

33. Record Lows
    Shown for current category selected on the display (#31).

34. Weather Ticker™

35. Current Wind Direction

36. Previous 2 Wind Directions

37. Touch Activated Backlight
    Momentary during battery power, always on/off for power adapter

38. Current Wind Speed

39. Wind Speed Alarm On Indicator
**Back of Display Unit**

1. **Integrated Hang Hole**  
   For easy wall mounting

2. **Plugin for Power Adapter**

3. **A-B-C Switch**  
   ID code that must match 5-in-1 sensor’s A-B-C switch to ensure units synchronize

4. **Clear Today**  
   Clears data recorded since 12:00am

5. **Clear All**  
   Clears all recorded data without having to reset time and date

6. **Reset**  
   Full reset to factory defaults

7. **Battery Compartment**

8. **Power Adapter**

9. **Battery Compartment Cover**  
   (not shown)
5-IN-1 Sensor Setup

1 Set the A-B-C Switch

Locate the A-B-C switch inside the battery compartment. Set the A-B-C switch to A, B or C. You must select the same letter choices for both the sensor and the display unit in order for the units to synchronize.

2 Install or Replace Batteries

Batteries MUST be installed for this product to operate. AcuRite recommends high quality alkaline or lithium batteries for the best product performance. Heavy duty or rechargeable batteries are not recommended.

The 5-in-1 sensor requires lithium batteries in low temperature conditions. Cold temperatures can cause alkaline batteries to function improperly. Use lithium batteries in the 5-in-1 sensor for temperatures below -4°F / -20°C.

1. Slide off the battery compartment cover.
2. Insert 4 x AA batteries into the battery compartment, as shown. Follow the polarity (+/-) diagram in the battery compartment.
3. Replace the battery cover.

3 Remove Rain Gauge Stabilizer

Locate and remove the rain gauge stabilizer (plastic tab) taped into the bottom of the sensor. The rain gauge will not function until this is removed.
Display Unit Setup

The display unit operates with batteries and/or power adapter. Regardless of the power source, it is recommended that batteries always be installed to ensure continuous operation (and retain records) in case of a power outage.

1 Set the A-B-C Switch

The A-B-C switch is located inside the battery compartment. It can be set to A, B or C. However, you must select the same letter choices for both the sensor and the display unit in order for the units to synchronize.

2 Install or Replace Batteries

Insert 6 x AA alkaline batteries into the battery compartment, as shown. Follow the polarity (+/-) diagram in the battery compartment.

3 Plug Power Adapter into Electric Outlet (optional)

PLEASE DISPOSE OF OLD OR DEFECTIVE BATTERIES IN AN ENVIRONMENTALLY SAFE WAY AND IN ACCORDANCE WITH YOUR LOCAL LAWS AND REGULATIONS.

BATTERY SAFETY: Clean the battery contacts and also those of the device prior to battery installation. Remove batteries from equipment which is not to be used for an extended period of time. Follow the polarity (+/-) diagram in the battery compartment. Promptly remove dead batteries from the device. Dispose of used batteries properly. Only batteries of the same or equivalent type as recommended are to be used. DO NOT incinerate used batteries. DO NOT dispose of batteries in fire, as batteries may explode or leak. DO NOT mix old and new batteries or types of batteries (alkaline/standard). DO NOT use rechargeable batteries. DO NOT recharge non-rechargeable batteries. DO NOT short-circuit the supply terminals.
Set the Time & Date

The clock and calendar are utilized to time stamp history records and other data, so it is important to set the time and date soon after you power on the display unit.

Set the Time

1. Press the “▲” or “▼” buttons until “SET CLOCK?” is displayed on the Selectable Category part of the display unit.
2. Press the “SET” button to set the clock.
3. Press the “▲” or “▼” buttons to adjust the hour. Note the “AM” and “PM” indicators.
4. Press the “SET” button to confirm hour selection.
5. Press the “▲” or “▼” buttons to adjust minutes.
6. Press the “SET” button to confirm minute selection.

The clock is now set.

Set the Date

1. Press the “▲” or “▼” buttons until “SET DATE?” is displayed on the Selectable Category part of the display unit.
2. Press the “SET” button to set the date.
3. Press the “▲” or “▼” buttons to adjust the month.
4. Press the “SET” button to confirm month selection.
5. Press the “▲” or “▼” buttons to adjust the day.
6. Press the “SET” button to confirm day selection.
7. Press the “▲” or “▼” buttons to adjust the year.
8. Press the “SET” button to confirm year selection.

The date is now set.

Note: The “　” stays in Selectable Categories, even after setup.
Select Measurement Units

To select between standard units (mph, °F, etc.) or metric units (kph, °C, etc.):

1. Press the “▲” or “▼” buttons until “SET UNITS?” is displayed on the Selectable Category part of the display unit.

2. Press the “SET” button to set the unit preference.

3. Press the “▲” or “▼” buttons to select “STAND” for standard or “METRIC” for metric units.

4. Press the “SET” button to confirm your selection.

5. Next, you will see “WIND MPH”. Press the “▲” or “▼” buttons to select MPH, KPH, or KNOTS for wind speed units.

6. Press the “SET” button to confirm your selection.

Units are now set.
Placement for Maximum Accuracy

AcuRite sensors are sensitive to surrounding environmental conditions. Proper placement of both the display unit and the sensor are critical to the accuracy and performance of this product.

Display Unit Placement
Place the display unit in a dry area free of dirt and dust. To ensure accurate temperature measurement, place out of direct sunlight and away from heat sources or vents. Display unit stands upright for tabletop use or is wall-mountable.

5-in-1 Sensor Placement
The 5-in-1 sensor is designed to remain outdoors all year long. Choose an open location with no obstructions above or around the sensor for the most accurate measurements.

Important Placement Guidelines
Display unit and sensor must be within 330 feet (100 m) of each other.

MAXIMIZE WIRELESS RANGE
Place units away from large metallic items, thick walls, metal surfaces, or other objects that may limit wireless communication.

PREVENT WIRELESS INTERFERENCE
Place both units at least 3 feet (.9 m) away from electronic devices (TV, computer, microwave, radio, etc.).

LOCATE AWAY FROM HEAT SOURCES
Position sensor away from heaters, air conditioners, chimneys, exhaust vents, asphalt and concrete (surfaces that radiate heat).

LOCATE AWAY FROM HUMIDITY SOURCES
Avoid installing the sensor near pools, spas, or other bodies of water. Water sources may impact humidity accuracy.

LOCATE AWAY FROM SPRINKLER HEADS
DO NOT install the sensor where it will be sprayed by a sprinkler system. This may force water inside the sensor.

LOCATE AWAY FROM WIND & RAIN OBSTRUCTIONS
DO NOT mount the sensor with obstructions around it. Consider a location that is a wide open area, with few structures around to ensure accurate wind measurement.

Visit us online to view installation photos and video, or learn more about AcuRite technology: www.AcuRite.com/5in1
5-in-1 Sensor Installation Guidelines

INSTALLATION HEIGHT  Mount the sensor at least 5 feet (1.5 meters) off the ground (higher is better for wind measurement) in an open area. Secure to fence post, 2” x 4” wood, 3/4” pole, etc. (not included)

LEVEL INSTALLATION  Use the bubble level on the top of the sensor to ensure level installation for accurate wind and rain measurement.

SOLAR CELL INSTALLATION  Install the sensor with the solar cell facing SOUTH. This ensures the cell receives as much sun as possible and orients wind direction.

5-in-1 Sensor Installation
1. Fasten mounting base (included) to a post or pole (not included) using the 4 longer screws included in the hardware bag.

2. Insert the mounting base into the hole on the bottom of the sensor.

3. Make sure the arrows on the top of the sensor are pointed in the proper direction and the bubble level is centered. The solar cell should be facing south to properly orient the wind direction.

4. Fasten the sensor into the mounting base using the 2 shorter screws included in the hardware bag.

   The 5-in-1 sensor is now ready to use.

Clear Data Collected During Installation
When installation is complete, clear erroneous data from the display unit by pressing the “CLEAR TODAY” button, on the back of the display inside the battery compartment. This button will clear data recorded since 12:00 am.

Basic Setup is Complete
The 5-in-1 sensor will now synchronize with the display unit. It may take a few minutes for synchronization to complete. If both or one of the units appear to be functioning improperly, please refer to the troubleshooting section.
Using the Professional Weather Center

Learning Mode
Self-Calibrating Forecasting use a unique algorithm to analyze changes in pressure over a time period (called Learning Mode) to determine your altitude. After 14 days, the Learning Mode icon disappears from the display screen. At this point, the self-calibrated pressure is tuned in to your location and the unit is ready for superior weather prediction.

Weather Forecast
AcuRite’s patented Self-Calibrating Forecasting provides your personal forecast of weather conditions for the next 12 to 24 hours by collecting data from the sensor in your backyard. It generates a forecast with pinpoint accuracy - personalized for your exact location.

Weather Select
Features weather data groups shown at right. To change “Weather Select” category, press the selection arrow button just to the left of the weather select display area.

   Heat Index
   Dew Point
   Wind Chill
   Indoor Conditions
   Rainfall Rate (in./hour)

Rainfall Event
The rainfall feature tracks rain accumulation over all-time, the current month, and current rainfall event. Current event clears when no rain registers for 8 hours OR no rain registers for 1 hour and pressure rises by .03inhg or more.

Barometric Pressure
Subtle variations in barometric pressure greatly affect the weather. This weather center displays the current pressure with an arrow icon to indicate the direction the pressure is trending (FALLING, STEADY, or RISING).
Weather Ticker™

The Weather Ticker automatically streams your real-time weather information and alerts as scrolling text in the lower part of the display unit screen.

You can manually cycle through all the available messages by pressing “SET”.

Default WEATHER TICKER messages are pre-loaded as follows:

<table>
<thead>
<tr>
<th>Message</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>FORECAST</td>
<td>12 to 24 hour future weather forecast</td>
</tr>
<tr>
<td>MOON PHASE</td>
<td>Current moon phase</td>
</tr>
<tr>
<td>INDOOR COMFORT</td>
<td>Dry, OK or humid comfort level</td>
</tr>
<tr>
<td>IT FEELS LIKE ___ OUTSIDE</td>
<td>Calculates what temperature it feels like outdoors (based on temperature, humidity and wind speed)</td>
</tr>
<tr>
<td>OUTDOOR TEMP THIS WEEK HIGH</td>
<td>Highest temperature recorded this calendar week</td>
</tr>
<tr>
<td>OUTDOOR TEMP THIS WEEK LOW</td>
<td>Lowest temperature recorded this calendar week</td>
</tr>
<tr>
<td>OUTDOOR TEMP THIS MONTH HIGH</td>
<td>Highest temperature recorded this calendar month</td>
</tr>
<tr>
<td>OUTDOOR TEMP THIS MONTH LOW</td>
<td>Lowest temperature recorded this calendar month</td>
</tr>
</tbody>
</table>

Additional Messages Include:

NEW HIGH TEMPERATURE RECORD
NEW LOW TEMPERATURE RECORD
NEW WIND SPEED RECORD TODAY
CURRENT RAINFALL RATE
CURRENT RAIN EVENT STARTED

NO RAIN RECORDED SINCE ____
WEATHER ALARM MESSAGES
SENSOR BATTERIES LOW
SENSOR SIGNAL LOST

Adjust the Weather Ticker Speed

1. Press the “▲” or “▼” buttons until “TICKER SPEED” is displayed on the Selectable Category part of the display unit.
2. Press the “SET” button to set the speed preference.
3. Press the “▲” or “▼” buttons to select a speed: SLOW, NORMAL, or FAST.
4. Press the “SET” button to confirm your selection.

Weather Ticker speed is now set.
Customize Weather Ticker Messages

Customize which messages you want to scroll across the WEATHER TICKER:

1. Press the “↺” button to manually cycle through each message available.

2. During the MANUAL REVIEW: PRESS the “✓” button to activate the current scrolling message. The corresponding “✓” appears on screen to the left of the message to indicate the message is now active in the ticker cycle. PRESS the “✗” button to deactivate the current scrolling message. The corresponding “✗” appears on screen to the left of the message to indicate the message is now deactivated from the ticker cycle.

Please note: Messages can only be added and removed to the ticker cycle during manual review. The “✓” and “✗” buttons do not add or remove messages during the automatic cycle.
Programmable Weather Alarms

Each Selectable Weather Category features an alarm option. When an alarm sounds, the display unit emits audible beeping and flashes the affected category, its alarm settings, and any other relevant data.

Some alarms can be customized to alert you when your programmed value is reached. Alarms include:

<table>
<thead>
<tr>
<th>Category</th>
<th>Low</th>
<th>High</th>
</tr>
</thead>
<tbody>
<tr>
<td>Outdoor Humidity</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Outdoor Temp</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Storm Alarm</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Indoor Humidity</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Indoor Temp</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Wind Chill</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Dew Point</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Heat Index</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Rain</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Wind Speed</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The rain alarm does not require a preset numerical value, but instead sounds as soon as rain is recorded. Similarly, the storm alarm sounds when a large atmospheric pressure drop occurs, which usually indicates an oncoming storm.

Note: The storm alarm is NOT intended to be a safety device or warning system.

Set a Weather Alarm

1. Choose the weather category for which you wish to set an alarm by pressing the “▲” or “▼” buttons until the category is displayed on the Selectable Category part of the display unit.

2. To program a value (only applies to alarms that require a value), press AND HOLD the “(▲)” button underneath the alarm you wish to set until the “ADJ” indicator appears and the alarm setting flashes.

3. Adjust the alarm value by pressing the “▲” or “▼” buttons.

4. Press the “(▲)” button to confirm a value.

5. Next, press the “(▲)” button to activate the alarm (the X indicator disappears when alarm is activated).

Alarm is now programmed and turned on.
Silence a Sounding Alarm

The alarm sounds initially for a few minutes, then silences itself. The alarm then sounds every few minutes afterwards until one of the following happens:

1. “SNOOZE“ - Press any button. Alarm silences, but sounds again if the alarm condition reoccurs.
2. Turn alarm “OFF“ - Deactivates alarm.
## Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Solution</th>
</tr>
</thead>
</table>
| **No outdoor sensor reception** | • Relocate the display unit and/or the 5-in-1 sensor. The units must be within 330 ft (100 m) of each other.  
• Make sure both units are placed at least 3 feet (.9 m) away from electronics that may interfere with the wireless communication (such as TVs, microwaves, computers, etc).  
• Use standard alkaline batteries (or lithium batteries in sensor when temperature is below -4°F/-20°C). Do not use heavy duty or rechargeable batteries. NOTE: It may take up to 20 minutes for display unit and sensor to synchronize after batteries are replaced.  
• Synchronize the units:  
1. Bring both the sensor and display unit indoors and remove batteries from each.  
2. Reinstall batteries in outdoor sensor.  
3. Reinstall batteries in display unit.  
4. Let the units sit within a couple feet of each other for about 20 minutes to gain a strong connection. |
| **Outdoor temperature is flashing or showing dashes** | Flashing of the outdoor temperature may be an indication of wireless interference.  
• Make sure the A-B-C switch in the battery compartments of both the display unit and sensor are switched to the same letter. You may choose A, B or C; but both units must match to sync up. Sometimes changing to a different channel can help. |
| **Weather Ticker Hard to Read** | • Slow down the speed of the ticker (see page 14). |
| **Inaccurate forecast** | • Weather Forecast icon predicts conditions for the next 12 to 24 hours, not current conditions.  
• Has Learning Mode icon disappeared from the display unit? Learning Mode must complete before forecast and pressure will be accurate.  
• Allow unit to run continuously for 33 days. Battery removal or resetting the display unit will restart Learning Mode. After 14 days, forecast should be fairly accurate, however Learning Mode calibrates for a total of 33 days. |
# Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Inaccurate temperature or</strong></td>
<td>• Make sure both the display unit and 5-in-1 sensor are placed away from any heat sources or vents (see page 11).</td>
</tr>
<tr>
<td><strong>humidity</strong></td>
<td>• Make sure both units are positioned away from moisture sources (see page 11).</td>
</tr>
<tr>
<td></td>
<td>• Make sure 5-in-1 sensor is mounted at least 5 ft off of the ground.</td>
</tr>
<tr>
<td></td>
<td>• Calibrate indoor and outdoor temperature and humidity (see page 20).</td>
</tr>
<tr>
<td><strong>No rainfall</strong></td>
<td>• Check to ensure the rain gauge stabilizer (plastic tab) has been removed from the bottom of the sensor (see page 7).</td>
</tr>
<tr>
<td></td>
<td>• Clear debris, such as leaves, out of the rain collector funnel and debris screen.</td>
</tr>
<tr>
<td></td>
<td>• Calibrate the Rain Gauge (see page 21).</td>
</tr>
<tr>
<td><strong>Inaccurate wind readings</strong></td>
<td>• What is wind reading being compared to? Pro weather stations are typically mounted at 30 ft high or more. Make sure to compare data using a sensor positioned at the same mounting height.</td>
</tr>
<tr>
<td></td>
<td>• Check location of the sensor. Ensure it’s mounted a minimum of 5 ft in the air with no obstructions around it (within several feet).</td>
</tr>
<tr>
<td></td>
<td>• Ensure wind cups are spinning freely. If they hesitate or stop try lubricating with graphite powder or spray lubricant.</td>
</tr>
<tr>
<td><strong>Display screen not working</strong></td>
<td>• Check that the batteries are installed correctly. Batteries may need to be replaced.</td>
</tr>
<tr>
<td></td>
<td>• Reset the display by pressing the reset button, located on the back of the display unit. Date and time will need to be entered after a reset.</td>
</tr>
</tbody>
</table>

If your AcuRite product does not operate properly after trying the troubleshooting steps, visit www.AcuRite.com or call (877) 221-1252 for assistance.
Care & Maintenance

Display Unit Care
Clean with a soft, damp cloth. Do not use caustic cleaners or abrasives. Keep away from dust, dirt and moisture. Clean ventilation ports regularly with a gentle puff of air.

5-in-1 Sensor Care
Clean the Sensor
Clean with a soft damp cloth. Do not use caustic cleaners or abrasives that will mar the polished surfaces of the rain collection funnel or the solar cell. Scratches will result in decreased performance and reliability.

Insect Prevention
Insects may cause obstructions and interrupt data by nesting in or on the 5-in-1 sensor. To limit this problem, spray sensor with a household insect repellent. Consult the insect repellent instructions prior to use.

Snow & Freezing Weather
The 5-in-1 sensor will not be damaged by freezing conditions. NOTE: If the rain collector cup fills with snow and then melts, it will register as rain on the display unit.

Clean the Rain Collector Cup
Remove and empty rain collector debris filter. The debris filter is located in the rain collector funnel. Remove from the top by gently squeezing and pulling out.

Clean the Wind Vane & Anemometer
Remove foreign matter from the outside of the sensor for free movement of the wind vane and anemometer. If needed, use a small amount of spray lubricant, clear silicone or graphite powder on the anemometer for improved movement.

Calibration

Calibrate Temperature & Humidity
The indoor / outdoor temperature and humidity readings can be calibrated on the display unit to improve accuracy. Calibration improves accuracy when 5-in-1 sensor placement or environmental factors impact your data accuracy.

1. Choose the weather category you wish to calibrate by pressing the “▲” or “▼” buttons until the category is displayed on the Selectable Category part of the display unit.

2. Press AND HOLD the “▲” or “▼” buttons and the “SET” button all at the same time for 15-20 seconds.
   - The display unit beeps, and all display data is hidden except for the value being calibrated.
   - “ADJ” (calibrate) and arrows appear next to the value being calibrated.
3. Press the “▲” or “▼” buttons to calibrate the data value higher or lower from the actual reading.

4. Press the “SET” button to confirm the calibration adjustment. Note: The “▲▼” icon remains illuminated next to calibrated values.

Calibrate the Rain Gauge
The rain gauge on the 5-in-1 sensor can be calibrated to improve accuracy. **Items Needed:** 5-in-1 sensor, display unit, plastic cup, pin, screw driver

1. First, ensure 5-in-1 sensor is perfectly level using built-in bubble level.
2. Place display unit close so you can monitor it during calibration.
3. Make a pin hole in the bottom of a plastic cup. Hold the cup over the rain gauge and fill it with exactly 1 cup (8oz) of water, allowing the water to drip into the rain gauge. You should hear the internal buckets tip and see water drain through the rain gauge.
4. A few seconds after each bucket tip, the display unit displays rainfall in approximately 0.01” or more increments.
5. The cup of water should take more than 20 minutes to empty; a quicker period will result in inaccurate calibration. Try to simulate a normal steady rainfall. When cup is empty of water, display unit should register 1.06”

Tips
• There should be nearly an equal number of water drops (about 25 water drops) between bucket tips. If not, adjust the calibration screws on the bottom of the 5-in-1 sensor until an equal number of water drops are tipping the buckets. Then, restart the calibration procedure.
• If you don’t hear the buckets tipping and see water dripping alternately out of each drain, there may be an issue with the rain gauge or it’s adjustment. See Troubleshooting on page 19.

Adjustment
If the rain gauge doesn’t register close to 1.06”, make an EQUAL adjustment to the two calibration screws on the bottom of the 5-in-1 sensor. Turning screws clockwise increases rainfall; counter clockwise decreases rainfall.
• To adjust the rainfall reading by 2% turn both screws 1/8 of a turn.
• To adjust the rainfall reading by 4% turn both screws 1/4 of a turn.
• To adjust the rainfall reading by 8% turn both screws 1/2 of a turn.

FCC Information

This device complies with part 15 of FCC rules. Operation is subject to the following two conditions:
1. This device may NOT cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and the receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user authority to operate the equipment.

This device complies with Industry Canada licence-exempt RSS standard(s).

Operation is subject to the following two conditions:
(1) This device may not cause interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation of the device.

Limited One Year Warranty
At AcuRite, we proudly uphold our commitment to quality technology. Chaney Instrument Co. warrants that all products it manufactures to be of good material and workmanship, and to be free of defects when properly installed and operated for a period of one year from the date of purchase.

We recommend that you visit us at www.AcuRite.com for the fastest way to register your product. However, product registration does not eliminate the need to retain your original proof of purchase in order to obtain warranty benefits.

Chaney Instrument Co. warrants that all products it manufactures to be of good material and workmanship, and to be free of defects when properly installed and operated for a period of one year from the date of purchase. Remedy for breach of this warranty is limited to repair or replacement of the defective item(s). Any product which, under normal use and service, is proven to breach the warranty contained herein within ONE YEAR from date of sale will, upon examination by Chaney, and at its sole option, be repaired or replaced by Chaney. Transportation costs and charges for returned goods shall be paid for by the purchaser. Chaney hereby disclaims all responsibility for such transportation costs and charges. This warranty will not be breached, and Chaney will give no credit for products it manufactures which have received normal wear and tear, been damaged (including by acts of nature), tampered, abused, improperly installed, damaged in shipping, or repaired or altered by others than authorized representatives of Chaney.

The above-described warranty is expressly in lieu of all other warranties, express or implied, and all other warranties are hereby expressly disclaimed, including without limitation the implied warranty of merchantability and the implied warranty of fitness for a particular purpose. Chaney expressly disclaims all liability for special, consequential or incidental damages, whether arising in tort or by contract from any breach of this warranty. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. Chaney further disclaims all liability from personal injury relating to its products to the extent permitted by law. By acceptance of any of Chaney’s products, the purchaser assumes all liability for the consequences arising from their use or misuse. No person, firm or corporation is authorized to assume for Chaney any other liability in connection with the sale of its products. Furthermore, no person, firm or corporation is authorized to modify or waive the terms of this paragraph, and the preceding paragraph, unless done in writing and signed by a duly authorized agent of Chaney. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.
