

PRODUCT CARE

FOR YOUR SOLID WOOD FURNITURE

Moisture and heat can damage any wood finish. Protect your furniture by using coasters and trivets. Always wipe up moisture promptly and dry with a soft cloth.

Avoid dragging sharp or rough objects across the surface of your wood furniture. Using adhesive felt pads, trivets, coasters and placemats will help prevent scratches.

Avoid direct contact with rubber bumpers and candle wax as it may react with the wood's finish and leave a stain.

Maintain consistent humidity levels to minimize seasonal expansion and contraction of wood and prevent warping.

Over time, air and sunlight will change the color of natural wood. Occasionally rotate the items placed on your wood furniture to allow a more uniform color to develop.

Dust with a soft, dry, untreated cloth. While dry dusting is the best cleaning method, you may use a slightly damp cloth with mild detergent as needed. Wipe dry.

Do not use cleaning products containing ammonia, alcohol or petroleum. Care for your wood furniture according to its finish.

thank you for your purchase!
