The StraightWall® Best selling TELESCOPING Partition

Starting at \$499.00

THREE YEAR WARRANTY

The StraightWall® Portable Partition system is an expandable adjustable divider that is available in any length up to 15' 6" long. No need to flex your screens to have them fit into your space.

The StraightWall® is expandable to any length without having your screens flex to fit. This revolutionary patent pending Portable Partition can be used alone or in conjunction with The Room Divider to make portable walls of any length and is available in heights of 4', 5', 6', 6'10" and 7'6". The StraightWall® allows you to maximize the use of your facility's space at affordable prices. The StraightWall® features a fully tackable, noise-reducing surface for posting signage or other documents. Each StraightWall® panel slides in series with other panels to create a straight wall of any length and its patent pending slides adjust to uneven floors without the need for fragile, adjustable caster bases offered by less versatile systems.

The StraightWall® features a patented full panel end member, which increases acoustical properties by trapping sound, creates a finished look when used as an entrance and eliminates the tripping hazard caused by U-frame design of other systems. Non-marking, low profile casters provide low clearance, helping with noise reduction and a lower center of gravity. All casters are under the panels and do not stick out to the sides like other systems. The StraightWall® ships fully assembled.

The StraightWall® has an elegant extruded aluminum frame which makes it strong yet very light, about half of other partitions made with steel frames. Each aluminum panel frame is joined through a unique cast aluminum corner joint providing superior strength and durability. The UHMW slides with aluminum covers allow for years of smooth operation.

Features

Extendable Sliding Mechanism

The StraightWall features a sliding mechanism which allows the partition to extend in a straight line, and accommodate fluctuations in floor flatness

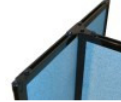

All Aluminum Frame Construction

The frame of The StraightWall and Room Divider is constructed of extruded aluminum profiles joined with cast aluminum corners joints for light weight strength and durability.

Patented Full Panel End Member

The StraightWall and Room Divider features a Patented Full Panel End Member giving the partition stability in all configurations.

Locking Caster

The StraightWall and Room Divider features 3" dual wheel locking casters on the full panel endmembers.

Tackable Surface

Each StraightWall and Room Divider acoustical panel has a tackable surface.

Unit to Unit Connectors

Each StraightWall and Room Divider comes standard with Unit to Unit connectors to join additional unit together to form longer partition walls.

Accepts Hooks

The stability of The StraightWall and Room Divider allows for hanging objects such as Artwork, Photos, Dry Erase Boards etc. over the top of the partition.

The Room Divider 360® Best Selling ARTICULATING Partition

Starting at \$499.00

** THREE YEAR WARRANTY**

The Room Divider 360® is a high-quality portable partition that helps you maximize the use of your facility's space. The Room Divider 360® features a fully tack able, noise-reducing surface for posting signage or other documents. Each Room Divider panel rotates 360° for infinite configuration possibilities using a patented 360 degree hinge. Unlike piano hinges used by other folding partitions, The Room Divider 360® hinge allows each panel to turn any direction, at any angle. Our patented no-pinch seams between each panel also reduce the possibility of fingers getting pinched.

The Room Divider 360® also features a full panel end member, which increases acoustical properties by trapping sound, and also creates a finished look when used as an entrance. This feature also eliminates the tripping hazard caused by the U-frame design of other systems. Non-marking, low profile casters provide low clearance, meaning additional noise reduction and a lower center of gravity. There are no loose parts to lose, and The Room Divider 360® ships fully assembled.

The Room Divider 360® has an elegant extruded aluminum frame which makes it strong yet lighter than partitions with steel frames. Each aluminum panel frame is joined through a unique cast aluminum corner joint providing superior strength and durability.

Features

PC Light Transmission
The Room Divider Polycarbonate panels allow light transmission from 12%-82% depending upon color.

PC Impact Resistance
The Room Divider Polycarbonate panels offer outstanding toughness providing greater protection against breakage. The impact strength is 10-17 times that of Plexiglas.

PC Thermal Insulation
The Room Divider Polycarbonate panels are fluted, providing excellent Thermal Insulation.

PC Weather Ability
The Room Divider Polycarbonate panels can maintain their properties from an extreme temperature range from -40C to 120C (-40F to 248F).

PC Fire Retardancy
The Room Divider Polycarbonate panels are Fire Retardant.

PC Sound Insulation
The Room Divider Polycarbonate fluted panels offer outstanding sound insulation.

PC UV Protection
The Room Divider Polycarbonate panels offer outstanding UV protection both through the surface and in color fading.

The Tall Wall wall mounted expandable partition system

Starting at ~~\$1,398.00~~ SALE \$1,298.00

Three Year Warranty

The Tall Wall is the first wall mounted, floor based partition system available for spaces needing higher than 8' of partition. The Tall Wall is an excellent and low cost alternative for areas with suspended ceilings that can't support a track system and for very high spaces where there is a need for noise reduction or sight division since the Tall Wall is available up to 10'3" high and 15'4" long. The Tall Wall can be customized to any height less than 10'3" for no additional cost.

The Tall Wall is available in lengths up to 15'4", by mounting to two opposing walls; this system can divide spaces up to 30'. The patent pending Tall Wall allows you to maximize the use of your facilities space at an affordable Price.

The Tall Wall panels can be covered in any of our 18 acoustical vertical fabrics, 6 colors of Vinyl, or 6 colors of our polycarbonate plastic.

The fabrics are tackable, will accept the hook side of Velcro and are sound absorbing. The polycarbonate plastic panels, are cleanable with harsh chemicals and are available in 6 different colors with different levels of translucence from clear to totally opaque.

You may also mix and match different colors of materials such as fabric on the lower half, and clear plastic on the upper half to allow light in while still separating your space.

The unique and patented pending sliding operation of the wall creates a straight partition that adjusts to uneven floors without the use of fragile adjustable casters that often break after a short period of time. Non marking, low profile casters provide a small gap at the bottom and allow for easy movement.

All casters are completely under the partition so nothing protrudes that could cause tripping. The Tall Wall ships in two halves, and are easily joined with our patented pin system.

The Tall Wall has elegant extruded aluminum frame which makes the unit very strong yet extremely lightweight, about half of other steel partitions. Each aluminum panel frame is joined through a unique cast aluminum corner to provide additional strength and durability. The UHMW slides allow for easy operation and years of use.

Tabletop Display
Starting at \$185.00

The Tabletop Display is a high-quality portable tabletop partition that helps you professionally display tradeshow and other literature. Can also be used as a study carrel, or tabletop divider.

The Tabletop Display features a fully tack able, noise-reducing surface for posting signage or other documents. Each Tabletop Display panel rotates 360° for infinite configuration possibilities using a patented 360 degree hinge.

Unlike piano hinges used by other folding partitions, the Tabletop Display hinge allows each panel to turn any direction, at any angle. Our patented no-pinch seams between each panel also reduce the possibility of fingers getting pinched.

The Tabletop Display has an elegant extruded aluminum frame which makes it strong yet lighter than displays with steel frames. Each aluminum panel frame is joined through a unique cast aluminum corner joint providing superior strength and durability.

The Tabletop Display ships fully assembled; available in 18 fabric, 6 polycarbonate plastic, and 6 vinyl finishes

Work Station Screen

Starting at \$157.00

THREE YEAR WARRANTY

The Work Station Screen in a flexible panel system designed to create a low cost professional looking workstation.

The Screens are available in one, two, and three panel configurations. Each panel is 70" tall and 33" wide, and has a 24" acrylic top panel for light passage.

This system can be used to create and organize private working areas, be used as a free standing partition to separate desks, or simply enhance and enclose an existing workstation.

Each of the three styles, one, two or three panel units, are self-supported, with no additional hardware required, so no need to attach to a wall or support between desks. The fabric covered panels are available in 18 colors. The flexibility of this system allows you to mix and match various configurations to meet your specific need.

VersiFold™ Room Divider

Starting at \$525.00

VersiFold® Portable Partitions can make your worship, work or classroom areas more versatile and liveable than you ever thought possible.

VersiFold® portable partitions are free-standing wall systems which offer superior sound control and pleasing visual effects. Unlike other room dividers, VersiPanel™ partitions meet the floor directly from end-to-end, keeping sound confined from other areas.

You can easily create additional office space, portable classrooms and temporary meeting areas. You can even change the look and feel of your building with moveable accent walls and partitions. Setup is quick and simple, providing a no-tools approach to designing and re-arranging a dynamic area.

MP10 Partition ECONOMICAL accordion Partition

Starting at \$269.00

Convert big rooms into smaller rooms quickly and easily with the MP10 Mobile Folding Partition. The MP10 is a mobile folding partition (10' long) which can divide 10' of space 4' (\$269), 6' (\$399) or 6' 10" (\$425) high.

The MP10 is constructed of heavy 16 gauge 1.25" round steel tubing with an industrial strength powder coat finish, and connected by rounded plastic corner joints for safety.

The attractive and durable 12 oz cotton fabric panels are tensioned between the tubular steel frame. Each panel is connected to the other via a patented 360 degree hinge.

When stored, it folds down to less than 4 square feet of floor space.

The MP10 also features our patented full-panel EndMembers that provide stability and safety by eliminating areas that children could stand or ride on.

The MP10 can be used with or without wheels, folded to divide spaces less than 10 feet wide, and expanded to any length by the purchase of additional units to meet all of your portable partition needs.

The MP10 is lightweight, flexible, sturdy and durable – all at an affordable price. This product is available in four colors, blue, red, black and beige.

Features

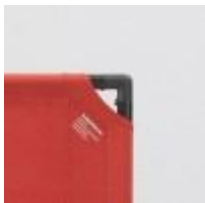

MP Patented 360-degree NoPinch™ hinges

Patented 360-degree hinge allows for easy partition manipulation into infinite positions.

Replaceable panels (100% cotton canvas fabric)

The attractive and durable 12 oz cotton fabric panels are tensioned between the tubular steel frame. The panels can be removed and replaced if necessary by opening a Velcro® flap on the top and bottom, removing the corner joints, and sliding the panel off of the frame.

Steel frame with round molded corners

Each fabric panel is tensioned between a heavy 16 gauge 1.25" round steel tubing for strength, connected by rounded plastic corner joints for safety.

MP Patented full-panel EndMembers

Patented full panel end member eliminates a tripping hazard common with other partition systems, reduces the possibility of anyone riding on the unit, and most importantly creates a stable partitioning system.

No Pinch Seams MP FP

The MP, and FP product features a no-pinch seam between each panel at the rotating joint.

Available in 4 different colors

The attractive and durable 12 oz cotton fabric is available in four colors, blue, red, black and beige.

Flame Retardant Fabric

Passes ASTM E-84

Snap in feet with removable 3" casters (wheels)

Outdoor Wicker Partition

Starting at ~~\$179.00~~ **SALE \$149.00**

The Outdoor Wicker Partition consists of a densely-woven wicker inner panel supported by two vertical aluminum posts.

This product is perfect for providing outdoor privacy in deck areas, and a good addition to conceal unsightly mechanical objects in landscape projects.

The Outdoor Wicker Partition produces an elegant look which can withstand the elements of the outdoors.

The wicker partition panel is supported by two 2" by 2" heavy gage square aluminum posts. Each post has a 24" long arched foot that is welded to the vertical post, then powder coated. The arched foot has two 5/8" holes so the partition can be staked in position. The mounting hardware is stainless steel for rust prevention.

The outdoor wicker partition is available in three heights, 45", 57" and 69" tall, and four colors, Black, White, Brown, and Tan.

The Lock N Block features a robust handle for easy positioning and operation

Lock N Block Tubular Steel Cross Bars
The Lock n Block features Tubular Steel Cross Bars, verses flat bar used in other models, to prevent pinch points.

Lock N Block Unit to Unit Locks
Caster bases can be locked together to prohibit unintentional opening and allows the unit to easily be moved from one location to another. To store, simply retract gate, engage unit to unit lock and roll it into a closet or lock it to a wall.
