The Italo Ventania is the largest ceiling fan in the Matthews Fan Co collection. Its vortex sculpted arms grasp also remarkable, side-mounted blades in gentle, equatorial rotation. The motor heads can be infinitely positioned in 180-degree arcs for optimum air movement; the greater the angle of the motor to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotational is achieved by both motor head position and fan blade speed. The Italo is available in polished chrome, brushed nickel, polished copper, bronze or black. White, brushed copper, polished brass, brushed brass, black nickel and bronzette are available as special orders. Bronzette, incidentally, is our monochromatic powder-coated bronze finish.

- Matthews rotational fans circulate heat and air conditioning more efficiently than traditional paddle fans.
- Constructed of cast aluminum, heavy spun and stamped steel, the Italo Ventania carries a limited lifetime warranty.
- Each unique motor mount and fan head knob is made of genuine marbled Bakelite.
- The Italo Ventania is available with the following blade options:
 - metal blades with decorative metal blade guards
 - solid, ecologically harvested mahogany blades without blade guards
 - metal blades with metal safety cages for use in low ceiling applications (7 ft in US / 8.2 ft in Canada)

Italo Ventania

weight: 24 lbs
voltage: 110*

Increasing Angles of Fan Heads to Support Poles Increases Speed of Axial Rotation
Optimum Fan Head Position is 60°

The Italo Ventania can be mounted with any one of the following downrod lengths: 5, 10, 20, 30, 48 or 72".

- The downrods can be easily field cut; they are not threaded.

The Italo Ventania is compatible with flat or vaulted ceiling canopies.

All fans best regulated by variable speed wall controls.

Metal bladed fans with protective powder or clear coatings are suitable for Damp Location.

Safety cages available for low ceiling applications.

*Please contact us for possible 220V conversions.
