

WHEELCHAIRS

The perfect upgrade from a standard K0004 wheelchair for geriatrics, the TRANSFORMER™ by PROBASICS™ is a dual purpose, high strength lightweight wheelchair that quickly “transforms” from a self-propelled chair to a compact transport chair with 8” wheels all-around. Great as a transitional chair for accompanied excursions while retaining self propel capabilities.

The Transformer™ by Probasics

- Lightweight aluminum frame
- 8” full swivel front casters mounted on aluminum forks
- 24” “quick release” rear wheels with composite handrims
- Bolted on 8” transport chair rear wheels
- Self-locking paddle release, flip-back desk length arms with padded armrests
- Lightweight black, woven nylon upholstery*
- Fold down back with easy release paddles
- Complete with 2 sets of lightweight aluminum wheel locks for both 24” and 8” rear wheel modes
- Durable blue flame finish
- Detachable flip-up rear anti-tippers
- Accessory pouch sewn into back
- Footrests include heel loops and composite footrests
- Folds for easy storage
- Limited lifetime sideframes and crossbrace warranty

Wheelchair Configuration

* Complies with California 117 Section E Flame retardancy requirements

Transport Chair Configuration

Blue Flame Finish
