

Our Promise to you: Please be assured your Quick Step product meets all the strict US Guidelines for flooring and is proudly produced in the United States of America.

Quick-Step® has always been a green choice

We're constantly seeking new ways to recycle, reduce, reuse, recover and renew at every step of the manufacturing process.

- Our U.S.-produced laminate boards are made of 74% preconsumer recycled wood fibers and chips from sustainable sources. Not one exotic tree is harvested to create our beautiful exotic floors.
- Rather than sent to the landfill, rejected products are integrated into our chipboard factory or reused by third-party manufacturers.
- Our patented locking system eliminates the introduction of VOCs typically associated with installation adhesives. And all Quick-Step® floors are California 93120 Phase 2 compliant for formaldehyde emissions and comply with all CARB (California Air Resource Board) requirements.
- When you're ready for a change, it's easy to unclick, remove and reuse our floors somewhere else or donate them to your favorite charity.

NALFA CERTIFIED

• We have earned the North American Laminate Flooring Association (NALFA) Certification Seal by passing a series of rigorous tests designed to evaluate our floors' performance, durability, strength and overall quality. So you can be assured that you're getting the best quality the industry has to offer.

FloorScore® CERTIFIED - Peace of Mind

Quick-Step flooring has earned the prestigious FloorScore certification for indoor air quality by passing the most stringent tests in the world. All Quick-Step products are officially FloorScore certified, giving families living on our flooring peace of mind that they are bringing a product into their home that meets strict indoor air quality standards.
