

SMART™

SMART THERMAFLO™

A revolutionary breakthrough in heater technology...

- so advanced it's patented worldwide!

Model SOH7000TA

Saves up to 33% Energy

- **Automatically** selects heat output to maintain room comfort level
- **Automatically** synchronizes fan speed to heat output for more intense heat

Canada's premier manufacturer and innovator of patented home comfort products for over 60 years.

SMART THERMAFLO™ provides cozy comfort... automatically!

Model SOH7000TA

1. Push switch "on"
2. Turn thermostat maximum clockwise
3. When comfort level is reached, turn thermostat counter-clockwise until RIGHT element light turns off. Leave at this setting.

You are now in SMART THERMAFLO™ mode.

>Smart< Thermaflo™ technology:

- saves energy by automatically adjusting heat output in Thermaflo™ mode to maintain desired room comfort level;
- automatically reduces heat output and synchronizes the fan speed, resulting in whisper quiet operation as the room comfort level is reached

>Smart< Thermaflo™ senses when the room temperature reaches the pre-set comfort level to automatically engage Thermaflo™ to the 1000 watts setting.

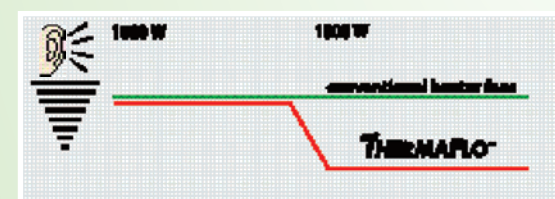

Should the room temperature drop, >Smart< Thermaflo™ will automatically sense at which heat level it must operate to maintain the comfort level.

Whisper quiet, hands free operation makes >Smart< Thermaflo™ ideal for use wherever zone heating is required. By dialing down your central thermostat to only heat the room in which you are in, >Smart< Thermaflo™ can save additional heating costs.

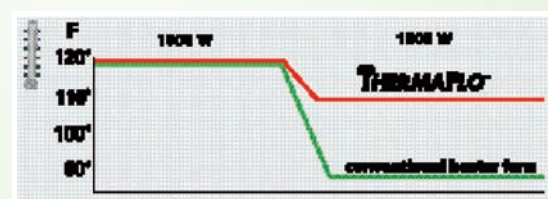

The **No Glow** high tech heating element delivers 5120 BTU's of heat... no other portable 120 volt heater delivers more heat!

- Patented Heat Sweep™ pulse action heater sweeps a curtain of cozy comfort 45 times per minute with four enclosed louvers.
- No external moving parts – safe for operation around children and pets
- Exclusive pulse action design, protected by US patent # 4,473,737, raises the temperature of an average sized room 14° F in just 20 minutes!

Thermaflo™ incorporates the most advanced innovation of the 21st century in heating technology.

NOISE LEVEL

EXIT AIR TEMPERATURE

Heaters deliver more intense heat in Thermaflo™ (1000 watt) setting by synchronizing fan speed with heat output

US patent #'s 6,940,051 B2 and 6,624,397 have been awarded for Thermaflo™ and SMART Thermaflo™ technology.

More SMART THERMAFLO™ Models Available:

Model SF6000TA - "Contempro"™ styling - ideal for all home and office environments.

Model SOH6000TA

Model SF12TA

Model SF12TA - Cord Free "Off the Wall"™ outlet mountable bed and bathroom heater.

The maximum weight that is allowed by Underwriters Laboratories and CSA for direct receptacle mounted heaters is 28 ounces. This restricts the size, wattage and features of the heater. The Seabreeze mounting bracket and lock bar overcomes this weight limitation by utilizing the outlet's outer structure to bear the weight of a full size heater. No tools (or electricians) are required and the bracket can be installed on any standard receptacle, regardless of the position of the installation.

Model SF10TA - "Slim Line"™ styling with deluxe cord compartment and built-in carrying handle – perfect for whole room heating where space is at a premium.

Model SF10TA

Model SOH3003TA

Model SOH3003TA - Deluxe black marble housing equipped with patented Heat Sweep™ design, sweeps a curtain of cozy comfort 45 times per minute.

THERMAFLO™ AND CONTEMPRO™ ARE REGISTERED TRADEMARKS OF SEABREEZE ELECTRIC CORPORATION
