NOTE FOR STUD MOUNTING :
· Anchor is not necessary for stud mounting.
· Additional tool/hardware may be required
  for stud mounting, or if on wall surfaces
  other than dry wall. Consult your local
  hardware store.

STEP 1

1a
Drywall mounting: Choose a desired location.
Mark mounting holes for anchors.

1b
Stud mounting: Choose a desired
location. Use a stud finer and mark
the location of studs.

STEP 2

2a
Drywall mounting: Tighten the anchors into
dry wall with Philips screw driver until anchors
are flush with the wall surface.

2b
Stud mounting: Drill pilot hole and drive
the stud screw into the pilot hole.

STEP 3
Tighten screws into anchor(s) and the stud(s).

1/8"
(3mm)

STEP 4
Hang shelf.

If shelf cannot hang on to the screws, untighten the screws slightly and re-hang.
Repeat as necessary.
