ATTENTION!

ASSEMBLY INSTRUCTION

For proper assembly, follow the instructions.

Remove Black Cap

Discard Before Assembly

A Black Cap protects the hydraulic mechanism on the Support Cylinder. Remove the Black Cap and discard it before assembly. The Orange hydraulic button will become visible.

Screw the Foot Rest onto the bottom of the Seat.

Guide the assembled Support Cylinder and Base into the hole on the bottom of the Seat and firmly press down on the Support Column.

To raise and lower the seat, grasp the Handle and pull upward without applying any weight on the seat. To lower, raise the handle upward by sitting on the seat.

To disassemble, turn the stool upside down and hit the metal clip in the center of the bottom of the Base with a rubber mallet to disengage the locking mechanism. Then, turn the stool right side up, and lift the Seat upward, pulling the Seat assembly off of the Base.

To remove the Seat from the Support Cylinder, turn the stool upside down, and gently strike the edge of the Seat where it meets the Support Cylinder.

Metal Clip
