

Deluxe Knee Wedge

- Use under the knees while reclining for comfort, pressure relief, and better circulation.
- Relieves pain in the lower back by flexing the lumbar spine.
- High-quality polyester cover for increased comfort.

Comfort & Convenience

The Deluxe Knee Wedge allows you to keep your legs in a comfortable position while lying down. Use the knee wedge to take pressure off of sore knees or to reduce numbness or tingling in the feet. These forms of discomfort typically occur after lying in bed for a prolonged time with your legs lying straight in front of you.

The Deluxe Knee Wedge promotes better circulation to the legs and feet and relieves tension in the lower back by flexing the lumbar spine.

For Recovery & Beyond

The Deluxe Knee Wedge also aids in the recovery from cosmetic procedures. For patients having a lower body procedure, the Deluxe Knee Wedge keeps swollen areas (particularly the thigh area) comfortably elevated. Elevation is recommended to reduce swelling because it promotes better blood circulation.

Beyond surgery, the Deluxe Knee Wedge is a great tool to increase comfort, relieve pressure and improve blood circulation.

Provides Support

The Deluxe Knee Wedge is constructed from precision-cut, high-quality foam, and comes enased in a plush blue polyester cover. The wedge is 20.5 inches wide and 9.5 inches high.
